

ENERGY BOOK ASSIGNMENT:

75 points

MUST BE HANDWRITTEN

NO TYPED PORTIONS, COPY/PASTED GRAPHICS, OR TEXT

Include the following energy sources, on 8.5" x 11" paper, one on each page/side, using the entire side of the paper:

OIL, NATURAL GAS, COAL, NUCLEAR

SOLAR, HYDRO, WIND and 1 other

Roughly half the page should be devoted to text and half to drawings or graphics. A table of pros and cons, terms and definitions, explanations and descriptions are all good candidates for 'text', but bits from your notes, copied into the booklet, are also suitable.

Color (in the graphics/drawings) helps with presentation, and with the grade.
