

Which pathways require oxygen? Where is the greatest yield of ATP? What organisms perform which pathways? Which pathways produce carbon dioxide? Which pathways load up electron carriers or "reducing power"? Where, in the cell, do we find these metabolic pathways?

Which pathways require oxygen? Where is the greatest yield of ATP? What organisms perform which pathways? Which pathways produce carbon dioxide? Which pathways load up electron carriers or "reducing power"? Where, in the cell, do we find these metabolic pathways?
