

Microscope Lab

Name: _____ per. _____

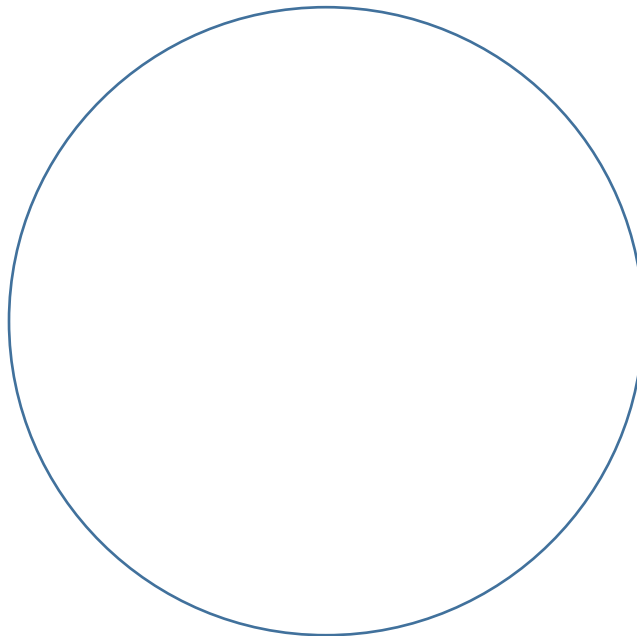

Confirm that you know the parts of a microscope by working with a partner, quizzing each other, until you are proficient, and you understand how *magnification multiplies*.

Sketch each of your **5 specimens** at the highest power possible for cell visibility. Indicate the magnification power next to your sketch. You must receive a stamp for all 5 specimens for full lab credit.

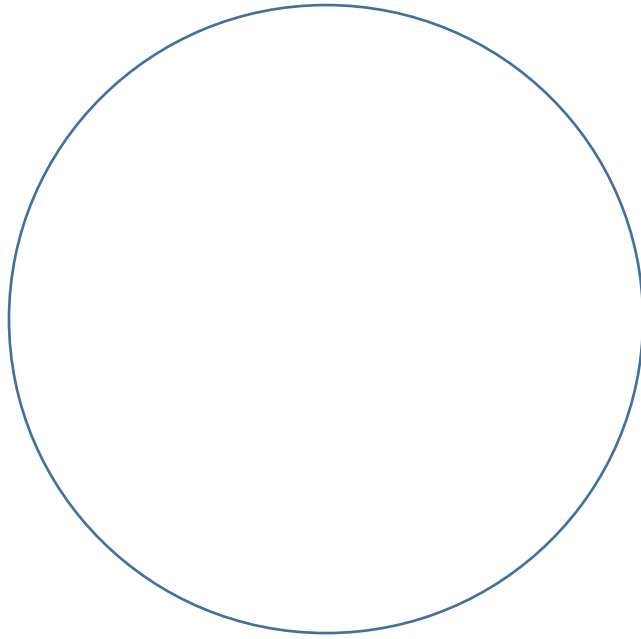

1. Crossed hairs (human)

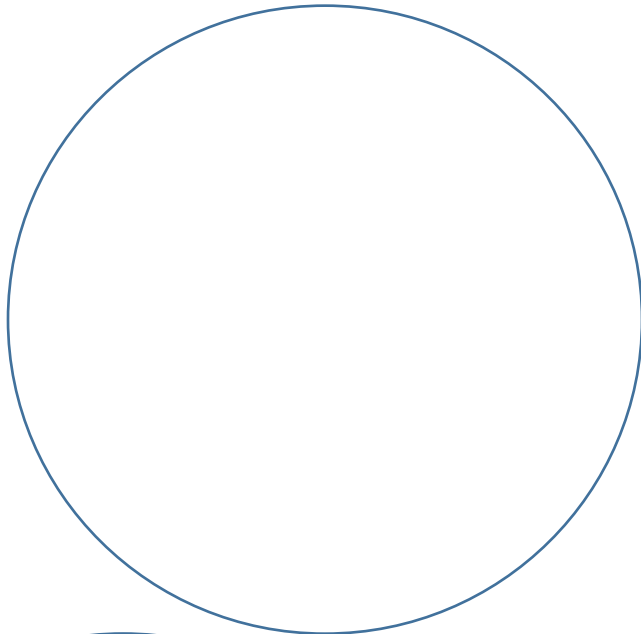

2. Elodea plant

3. Onion

4. Epithelial cheek cells (human)

5. Elective

Be sure to label
and indicate magnification
